

\$1 Billion over 10 years

Total number of schools 215

Of which:

- 173 schools are not impacted by closure or merger
- **Renovation work** will commence immediately on 40 schools
- **Closure is proposed** for 13 State Primary and Intermediate schools (2 of these schools have already volunteered to close)
- **Merger is proposed** for 18 State Primary schools
- New Year 1-13 school will be built to replace 3 Primary, 1 Intermediate and 1 Secondary school
- Education provision for 3 Banks Peninsula schools will be consolidated under the umbrella of the Area School but remain on their existing sites
- Geotechnical information is still being sought for three secondary and two primary schools. Until that information is available we cannot make any firm proposals about the future of those schools. In the interim we have put up some options for discussion around secondary provision.

Explanation of categories:

- **Restore** - this category groups together work that can be described as low-level change, such as earthquake repairs and major works that can be progressed quickly for a cluster of schools, or individual schools
- **Consolidate** - this refers to a range of moderate-level changes needed to address issues being experienced by schools facing declining roll size due to population shifts and decisions on the integrity of buildings and land
- **Rejuvenate** - is about implementing major change across a cluster of schools – this category provides the greatest opportunity for significant innovation.
