

Inaugural Professorial Lecture:

Teaching for the Future

Presenter: Professor Lindsey Conner

This lecture will discuss recent trends in education internationally, including the findings from the OECD Innovative Learning Environments project and the implications for initial and ongoing teacher education. Professor Conner will also discuss some of the key findings from the New Zealand Ministry of Education funded Secondary Students Achievement project that is the focus of her latest book: *Teaching as Inquiry, with a Focus on Priority Learners*.

About the presenter:

Professor Lindsey Conner has been a teacher educator at the Christchurch College of Education and University of Canterbury for 18 years. Previously, Lindsey was a secondary science and biology teacher and Head of Department. She has since been a national examiner in New Zealand, a developer of national standards assessments and assessment tasks, a consultant on developing science curricula and assessment practices internationally and has been involved in numerous international comparative research and development projects on teacher education. Lindsey is the Director of the Science and Technology Education Research Lab at the University of Canterbury. Her team has been researching the effectiveness of multimodal approaches to learning and the implications for teaching.
